

Nadine Schares – Additional Interventions

In addition to Nadine Schares' remarks presented at the top of this webpage, several other interventions made by her during the council meeting deserve to be highlighted.

05 A: For Nadine Schares, it is important that this regulation — like all others — be published on the municipality's website so that residents can inform themselves accurately.

06 D: Our group leader thanked the staff of the Social Office, who are dedicated to this vitally important social work. She pointed out that, given the total population of approximately 42,000 residents in the municipalities participating in the Mamer Social Office and considering the financial resources available, there is certainly room for additional staffing should further personnel become necessary.

08 A: Through a number of specific questions, she sought clarification regarding the procedures used to recover outstanding amounts owed to the municipality.

09: Nadine Schares welcomed the reforms introduced at the music school and expressed the hope that they will help provide young people with a high-quality musical education while preserving their enjoyment of making music. She hopes that all challenges, both in terms of staffing and infrastructure, can be successfully addressed and that everyone interested will have the opportunity to attend music classes.
